Communication, social & academic development

***Playground Politics** **Stanley I. Greenspan**
Understanding the emotional life of your school age child.

***Special Education Law** **Peter W.D. Wright**
Full text of the NCLB act, analysis and interpretation, strategies, sample letters and glossaries

IEP & Inclusion Tips for Parents & Teachers Handout Version BY: Anne I Eason
Promotes inclusion success for students, teachers and parents. Features 127 tips focusing on IEP and inclusion processes. Includes chapters on: Getting prepared for IEP meetings, creating legally correct and educationally sound IEPs, ensuring access to the general curriculum, tracking IEP progress and forming effective family/school partnerships. The handout is an inexpensive version and is ready to give to those who benefit - parents and teachers.

About the Author

Anne I. Eason is a special education attorney who limits her practice to inclusive education. She also trains parents and professionals about least restrictive environment for students with disabilities. Kathleen Whitbread, Ph.D., is an Assistant Professor of Pediatrics and Associate Director of Programs for the University of Connecticut A.J. Pappanikou Center for Excellence in Developmental Disabilities Education, Research, and Service. Dr. Whitbread has over 20 years of experience in designing and managing programs in the fields of education and human services.

Wrightslaw Special Education Law (second edition) **Pete W.D. Wright**
Includes text of key laws and regulations. IDEA 2004,NCLB and much more.

No Child Left Behind **Pete W. D. Wright**
Full text of the NCLB act, analysis, strategies, sample letters and glossaries.

***From Emotions to Advocacy** **Pam Wright and Pete Wright**
The special education survival guide

***The Complete IEP Guide** **Lawrence M. Siegel**
How to advocate for your special education child

***How To Be A Para Pro** **Diane Twachtman – Cullen**
A comprehensive training manual for paraprofessionals. (ever wonder)

***Evidence of Harm** **David Kirby**
Mercury in vaccines and the autism epidemic. A medical controversy.

IDEA 2004 Peter W.D. Wright and Pamela Darr Wright

Includes full text of parts A and B of IDEA 2004 with commentary, analysis, interpretation, and cross-references.

***How Well Does Your IEP Measure Up? Diane Twachtman-Cullen**

Quality Indicators for effective service delivery.

***Writing Measureable IEP Goals and Objectives Barbra D. Bateman and Cynthia M. Herr**

Contains updates from idea 2004. This book proposes a way to prepare the heart & soul, the nitty gritty, the critical parts of the iep in a way that is simple, clear, useful, economical, worthwhile, common, sensical, legally correct and revolutionary. Writing IEP, Present levels of performance PLEP, goals and statement of service. A must read for parents with a special needs child in public education systems.

***The Real Rain Man Fran Peek**

A father's inspiring account of Kim Peek, made famous by Oscar winner Dustin Hoffman

***Louder Than Words Jenny McCarthy**

A mother's journey in healing autism

The New Social Story Book Illustrated Edition Carol Gray

Selected by "Library Journal" as "Essential for All Collections," Gray's "The New Social Story Book" contains her groundbreaking concepts that are being used all over the world to teach vital social and functional skills to children with autism. Illustrations.

Comic Strip Conversations Carol Gray

A comic strip conversation is a conversation between two or more people that incorporates the use of simple drawings. These drawings illustrate the dynamics of communication, providing support to individuals who struggle with the quick exchange of information in a conversation. This book has become a staple for parents and professionals working with students with autism and other developmental disabilities. The visual supports provide not only concrete social cues, but also can improve students' understanding of the more abstract components of conversation. It's short and sweet, easy to implement, and fun to work with.

***The Social Skills Picture Book Jed Baker**

A dynamic teaching tool for children with autism or Asperger's Syndrome, "The Social Skills Picture Book" offers pictures of the right and wrong ways to handle nearly 30 social skills, such as conversation, play, emotion, management, and empathy.

Ten Things Every Child With Autism Wishes You Knew Ellen Notbohm

"Showing superb wisdom, experience, and articulation Ten Things Every Child with Autism Wishes You Knew has given us hope." An excellent teaching tool for new IEP team members and teachers as well as extended family members.

***Ten Things Your Student With Autism Wishes You Knew Ellen Notbohm**

Ellen Notbohm's first book, Ten Things Every Child with Autism Wishes You Knew, was a shot heard throughout the worldwide autism community, branded by readers as "required reading for all social service workers, teachers and relatives of children with autism." Now, for the teacher in all of us comes Ten Things Your Student with Autism Wishes You Knew. The unique perspective of a

child's voice is back to help us understand the thinking patterns that guide their actions, shape an environment conducive to their learning style, and communicate with them in meaningful ways. Ten Things Your Student with Autism Wishes You Knew affirms that autism imposes no inherent upper limits on achievement, that both teacher and child "can do it." It's the game plan every educator, parent, or family member needs to make the most of every "teaching moment" in the life of these children we love.

The Autism Acceptance Book **Ellen Sabin**

The Autism Acceptance Book is an interactive, educational, and character-building book that introduces children to the challenges faced by people with autism while also supporting their personal journey toward appreciating and respecting people's differences. This book offers educational information, conversation-starters, and engaging exercises that invite children to "walk in someone else's shoes" as they learn to treat others the same way they would like to be treated themselves.

My Friend with Autism **Beverly Bishop**

A coloring book for peers & siblings. Created as a coloring book with a surprising educational twist, My Friend with Autism actually is written for anyone who comes in contact with an autistic child, including young classmates, neighbors, church members, and professionals. The book explains in two ways what autism is and how the behavior of autistic children can be different: children enjoy the coloring book which is packed with the message; others will find the "Notes for Adults" in the back of the book thought-provoking and a succinct definition of the autism spectrum. Teachers will discover this book invaluable because of its capability to foster integration of autistic children into the student group.

Social Skills Picture Book for High School and Beyond **Jed Baker**

In 2001, Dr. Baker wrote The Social Skills Picture Book, designed for young children with social communication challenges. Now, in response to the deluge of requests from parents with children in their teens, here is Dr. Baker's long-awaited book, specifically geared toward older students. The Social Skills Picture Book for High School and Beyond offers a visual learning format. Photos of actual students engaging in a wide variety of social situations show, rather than tell, the right (and wrong) ways to interact in different circumstances. They visually illustrate the positive and negative consequences of both ways of interacting. The book also offers instructions for students & families to create their own social skills booklets. The social skills address real-life situations that are important to teens, such as: making new friends, asking someone out on a date, doing difficult schoolwork, interviewing for a job, and much, much more!

Special Diets For Special Kids TWO **Lisa Lewis**

Dr. Lewis' "clarity and common-sense approach" to gluten-free and casein-free diets is expanded into a second volume, offering even more recipes, highly appreciated by the readers of her first book, Special Diets for Special Kids.

The Kid-Friendly ADHD and Autism Cookbook **Pamela Compart**

The best kid-friendly recipes and guide to the gluten-free milk-free diet for ADHD and Autism. **What it is. Why it works. How to do it.** The Centers for Disease Control reports significant increases in Autism and ADHD - both affecting primarily boys. The CDC estimates that 1 out of 175 children (age 4 to 17) currently have Autism (300,000). Before 1985, Autism occurred in less than 1 out of 2000. ADHD is much more common in that it affects 4.4 million U.S. children (age 4 to 17). Common to both of these conditions is the negative impact of certain foods - especially milk products and glutens such as wheat (and to a lesser degree - soy and corn.) One of the challenges that parents face is coping with children who have picky appetites and crave the very foods that affect their behavior, focus and development. The other challenge is finding

ways to get their children to eat healthy foods and improve their nutritional status. The uniqueness of this! book is that it not only provides gluten-free milk-free substitutes and recipes, it provides successful suggestions for feeding the picky eater. The authors share details about just how and why the diet works. The specialty ingredients are explained and extensive sources provided. There are also testimonials from the parents and from the children themselves.

Autism Spectrum Disorders Chantel Sicile & Temple Grandin

The Complete Guide to Understanding Autism, Asperger's Syndrome, Pervasive Developmental Disorder, and Other ASD,s. **Bernard Rimland, Ph.D., Director, Autism Research Institute, Founder, Autism Society of America**

This book is not merely highly recommended - it is highly indispensable!

Temple Grandin, Ph.D., author, *Thinking In Pictures*

...information from personal experiences will give...parents and professionals...insight into how people on the spectrum perceive the world.

Playing, Laughing and Learning With Children on the Autism Spectrum: A Practical Resource of Play Ideas for Parents and Carers Julia Moor

Parents of young children on the autism spectrum are often at a loss for ideas about how best to help their child. *Playing, Laughing and Learning with Children on the Autism Spectrum* shows how to break down activities into manageable stages and looks at ways to gain a child's attention. Case studies illustrate how obsession and ritual can be redirected positively and how to build on small achievements. Each chapter centers on a theme: music, art, reading, physical activities, puzzles, playing outdoors and turn taking and can be used for toddlers and older children who struggle with play.

Relationship Development Intervention With Young Children: Social and Emotional Development Activities for Asperger Syndrome, Autism, Pdd and Nld Steven Gutstein

Friendship, even for the most able, requires hard work, and the odds are heavily stacked against those with autism spectrum disorders. Designed for younger children, typically between the ages of two and eight, this comprehensive set of activities emphasizes foundation skills such as social referencing, regulating behavior, conversational reciprocity and synchronized actions. The authors include over 300 objectives to plan and evaluate a child's progress, each one related to a specific exercise. Suitable for parental use, the manual is also designed for easy implementation in schools and in therapeutic settings. A comprehensive website acts as companion to the book, free to purchasers.

**Relationship Development Intervention With Children Adolescents and Adults
Steven Gutstein**

Remove our emotional bonds with family, colleagues and friends and few of us would want to go on living. Yet establishing and maintaining such bonds is particularly difficult for people on the autism spectrum. This volume contains over 200 activities and exercises ranging over the entire gamut of social and emotional development, and is applicable to anyone, regardless of diagnosis, but will be particularly valuable for those on the autism spectrum. Activities can be undertaken independently, or with a teacher or therapist, and a full schema for the evaluation of progress and objectives is included. A companion website provides a wealth of further information and support.

Autism Aspergers: Solving the Relationship Puzzle--A New Developmental Program that Opens the Door to Lifelong Social and Emotional Growth Steven Gutstein

A practicing psychologist offers a new approach to developing social skills and relationships in children diagnosed with autism or Asperger's Syndrome. Dr. Gutstein describes ways to steer these children onto a bright new path of self discovery and social awareness, one that will ultimately bring them home to meaningful friendships, shared emotions and heartfelt connection with the people in their lives.

Initiations and Interactions: Early Intervention Techniques for Children with Autism Spectrum Disorders Teresa A. Cardon

Research suggests an early start is the key to a successful intervention for children diagnosed with an autism spectrum disorder. What many don't know is that research also shows that for most early intervention programs to be effective, they must involve a child's primary caregivers, especially when it comes to such an all-pervasive area as communication. This book does not advocate that parents steer clear of therapists and specialists. Instead, it attempts to put more control in the parents' hands. Without adding to parents' already busy schedules, Teresa Cardon, a speech language pathologist and author of best-selling Let's Talk Emotions (see page 33), discusses the importance of creating a communication environment in the home. Simple everyday tools include deliberate use of books, toys, visual schedules, and labeling, among others. If your child is currently receiving several therapies, or if you are trying on your own to help encourage and foster communication interactions with your child, take the tools you find helpful in this book and make sure that a "family-centered" approach is part of your weekly regime. If your child is one of the thousands who have been "wait-listed" for services, wait no more - the tools are at your fingertips!

Peer Play and the Autism Spectrum: The Art of Guiding Children's Socialization and Imagination Pamela J. Wolfberg

This field manual provides abundant guidelines and details to implement the play groups in a variety of settings. Here is finally a book about developing social and imaginative play--not only play skills--in children with autism.

A Work in Progress: Behavior Management Strategies & A Curriculum for Intensive Behavioral Treatment of Autism Ron Leaf

Behavior Management strategies

Inclusive Programming for Middle School Students with Autism/Asperger's Syndrome Sheila Wagner

This offering was written by popular demand after the tremendous success of Inclusive Programming for Elementary School Students with Autism. Sheila Wagner's engaging and readable style, coupled with her extensive knowledge and classroom experience, make the book indispensable for professionals and non-professionals alike. She covers everything from academic requirements and homework issues to social conflicts, such as dress codes and raging hormones.

Inclusive Programming For Elementary Students with Autism [ILLUSTRATED] Sheila Wagner

Winner of the Autism Society of America's "Book of the Year Award," Sheila Wagner's book provides on inclusion program for students with severe disabilities. Each inclusion program must be developed individually, with each student's abilities and characteristics as the guiding factor for the program. Forms, which can be copied, are included in the book, which is primarily written for teachers but beneficial to parents of children with autism as well.

Inclusion: 450 Strategies for Success: A Practical Guide for All Educators Who Teach Students With Disabilities Peggy A. Hemmeken

Inclusion: 450 Strategies for Success guides teachers through all aspects of inclusive education, from program implementation to working effectively with students and colleagues in the general education environment. This resource shows how to improve student learning in all academic areas and includes hundreds of practical, teacher-tested adaptations and modifications, along with reproducible forms.

Inclusion Strategies That Work!: Research-Based Methods for the Classroom
Toby J. Karten

A comprehensive text of activities and worksheets for teachers and students . . . a must read!

More Inclusion Strategies That Work!: Aligning Student Strengths With Standards
Toby J. Karten

"The book is content rich and contains a wealth of examples and ideas to spark teacher creativity."

Jacqueline S. Thousand, Professor of Special Education, California State University, San Marcos *"The worksheets, lessons, and concrete practical discipline applications. Match and heighten students' and teachers' abilities while honoring standards."*

Movement with a Purpose: Perceptual Motor-Lesson Plans for Young Children
Madeline Mrehem

Movement activities that will support brain development and physical development. Crossing the midline and other activities parents can implement and play at home.

Changing The Course Of Autism: A Scientific Approach for Families and Physicians BY:
Dr. Bryan Jepson
Doreen Granpeesheh, Ph.D. BCBA, Executive Director, Center for Autism and Related Disorders (CARD)

Dr. Bryan Jepson demystifies the disorder by providing the most up to date information on symptoms, detection, diagnosis, treatment, and the impact of the disorder on families of individuals with autism. Based on Dr. Jepson's extensive research and clinical observations, this book answers the myriad of questions about autism with authority and compassion.

Children with Starving Brains BY: Dr. Jacqueline McCandless

In the midst of a worldwide epidemic of autism, ADD, and ADHD, this book is a message of hope to parents embarking on the challenging journey of finding proper medical care for their Autism Spectrum Disorder children. Genetic susceptibility activated by "triggers" such as pesticides and heavy metals in vaccines can lead to immune system impairment, gut dysfunction, and pathogen invasion such as yeast and viruses in many children.

This is the first book written by an experienced clinician that gives a step-by-step treatment guide for parents and doctors based on the understanding that ASD is a complex biomedical illness resulting in significant brain malnutrition. Dr. McCandless, whose grandchild with autism has inspired her "broad spectrum approach," describes important diagnostic tools needed to select appropriate treatment programs. Her book explains major therapies newly available and identifies safe and effective options for parents and physicians working together to improve the health of these special children.

***A Parent's Guide to Developmental Delays BY: Laurie LeComer, M. E.d.**

Recognizing & coping with missed milestones in speech, movement, learning, and other areas.

***The Growth of The Mind BY: Stanley Greenspan**

Stanley Greenspan's book reveals the six fundamental levels that form the architecture of our minds. Progress to these levels depends on a series of critical but subtle emotional transactions between infant and developed caregiver. In mapping these interactions, Dr. Greenspan reveals not only the origins of creative and analytic thinking but warns that these mind-building experiences are being eroded in child-rearing and educational practices. He offers specific solutions to restore them in families, daycare, schools, and in social policy.

***The Rainbow Book BY: Hilopa'a Project "2006"**

A medical home guide to resources for children's youth with special health care needs and their families.
